

Assignment 4

L715/B659

Due Tuesday, October 18

Give me a 1–2-page write-up on what you see at this stage as a viable project, especially now that we've spent a few weeks getting into various papers. In particular, I want you to address what **data** you will need and where you find such data. You may have to be creative, depending upon what you want to accomplish.

You don't need a full-blown project idea, but you'll need a clear enough picture of what you want to accomplish before you can see the types of data that may be relevant. At the same time, you'll probably have to adapt your project depending upon the data that is actually available.

Note that you are still not fully committing to a project topic. You are figuring out the data landscape and how that affects the type(s) of thing(s) you want to do.
